DETAILED ACTION

1. This communication is in response to amendment filed 11/16/06.

Response to Amendment

2. Claim 1 has been amended. Claims 1-4 remain pending.

Response to Arguments

3. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejections.

Claim Rejections - 35 USC § 112

4. Claims 1-4 are rejected under 35 USC § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The amended claim recites step d. as “identifying at least one corrective action ...when said comparing indicates that the second value of risk and return differs from the first value of risk and return.” This (conditional recitation) renders the claimed invention indefinite because the scope of the claim when the aforementioned parameters (i.e. second value of risk and return

Art Unit: 3693

and first value of risk and return) do not differ is not clear. It is suggested that the claim recite this as:

Based upon the comparison of the second value of risk and return and first value of risk and return.

Claim Rejections - 35 USC § 101

5. Claims 1-4 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In accordance with the revised Interim Guidelines for Subject Matter Eligibility (refer to web link, http://www.uspto.gov/web/offices/pac/compexam/interim_guide_subj_matter_eligibility.html) for details), a claimed invention as a whole must be useful and accomplish a practical application.

To determine whether the claimed invention satisfies the “practical application” requirement, the claimed invention must produce a useful, concrete and tangible result. The focus is on the result of the claim as a whole, not the individual steps or structure used to produce the result.

A useful, concrete and tangible result must be either specifically recited in the claim or flow inherently therefrom. To flow inherently therefrom, it must occur. If there is a reasonable exception or it is merely likely that it would occur, it does not “flow inherently therefrom” and the claim would need to be amended to specifically recite the result.

5.3 Claim 1, does not produce a useful, concrete and tangible result because, step d. merely states that at least one corrective action is identified based upon the comparison performed in step c. However the claims recites that the corrective action is identified only when the two parameters (second value of risk and return and first value of risk and return) differ from each other. This defect causes lack of concreteness.

Furthermore, merely identifying corrective action does not translate into actual implementation of the corrective action, which would dynamically adjust the recited characteristics of step d.

The examiner recommends the following amended step d. to overcome both 112 (second) and 101 rejections.

“identifying and implementing at least one corrective action to dynamically adjust at least one of based upon the comparison of the second value of the desired risk and return and the value of the desired risk.

Allowable Subject Matter

3. Claims 1-4 are allowable over prior art subject to correction of the deficiencies outlined above.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

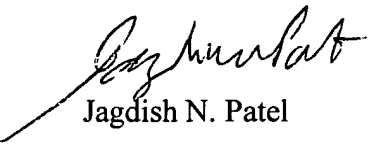

Art Unit: 3693

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
